Profile

Third-year Bachelor of Information Technology undergraduate at SLIIT with hands-on experience in **Software Quality Assurance, Manual Testing, Automation Testing, Full-Stack Development, and UI/UX Design**. Experienced in designing and executing test cases, preparing test documentation using **Excel**, defect reporting and tracking using **Jira**, API testing, and web application testing. Possess practical exposure to **Selenium WebDriver, Playwright, Cypress, TestCafe, Postman, and Apache JMeter** through academic and independent projects. Strong understanding of SDLC, STLC, Agile methodologies, and software testing best practices. Fast learner with strong analytical thinking, problem-solving, communication, collaboration, leadership, and adaptability skills.

Technical Skills

Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Test Case Design, Defect Reporting, SDLC, STLC, API Testing, SQL, Jira, Excel

Automation Testing: Selenium WebDriver (Java), Cypress, Playwright, TestCafe, Apache JMeter, End-to-End Testing, Cross-Browser Testing, Performance Testing

Programming Languages: Java, JavaScript, C, C++, Kotlin

Frontend Development: React.js, HTML, CSS, Bootstrap, Tailwind CSS

Backend Development: Node.js, Express.js, Spring Boot

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Eclipse, Android Studio, Jenkins, Docker, ClickUp, Figma

Soft Skills: Analytical Thinking, Problem Solving, Communication, Collaboration, Adaptability, Continuous Learning, Decision Making

Education

Bachelor of Information Technology (3rd Year) 2024 – Present

Sri Lanka Institute of Information Technology (SLIIT)

G.C.E. Advanced Level (Bio Science Stream) 2022

Passed on First Attempt

G.C.E. Ordinary Level 2019

Passed on First Attempt

Professional Certifications

▪ **Higher National Diploma (HND) in Information Technology** 2023 – 2025
Sri Lanka Institute of Information Technology (SLIIT)

▪ **Introduction to Software Quality Assurance** 2026
University of Moratuwa

▪ **Agile Project Management in ICT Projects** 2025
University of Moratuwa

QA & Automation Testing Projects

Playwright E-Commerce Test Automation Project

Individual Testing Project

- UI automation testing using Playwright and JavaScript.
- Automated login, cart, and checkout workflows.
- Applied Page Object Model (POM) and generated reports.

ParaBank Online Banking Application Testing

Individual Testing Project

- Automated banking workflows using Selenium WebDriver, Java, TestNG, and Maven.
- Covered registration, login, account management, and transactions.

TestCafe E-Commerce Application Testing

Individual Testing Project

- UI automation testing using TestCafe and JavaScript.
- Automated user registration, login, and cart features.
- Generated execution reports for analysis.

Cypress OrangeHRM Application Testing

Individual Testing Project

- Automated testing using Cypress.
- Validated login, dashboard, and employee management features.

API Testing with Postman and Newman

Individual Testing Project

- Performed API testing for GET, POST, PUT, DELETE methods.
- Executed collections using Newman CLI and generated reports.

OrangeHRM Manual Testing

Individual Testing Project

- Designed manual test cases using Excel.
- Performed functional, regression, smoke, and sanity testing.
- Logged and tracked defects using Jira.

Academic Testing Project

Automated Testing for Singlish to Sinhala Transliteration System

Year 3 | Semester 1 | ITPM

- Developed a Python-based UI automation testing solution using **Playwright**.
- Automated execution of 60 negative test cases using Excel-based data-driven testing.
- Generated pass/fail reports and analyzed transliteration inconsistencies and system limitations.

Software Development Projects

MedCore – Online Doctor Appointment Booking System

Year 1 | Semester 2 | IWT

- Developed doctor module and appointment management system using PHP, MySQL, HTML, CSS, and JavaScript.
- Built responsive UI and basic CRUD functionalities.
- Contributed to frontend and backend development.

Eventura – Online Event Planning System

Year 2 | Semester 1 | OOP

- Developed vendor management module using Java, MySQL, Bootstrap.
- Implemented Contact Us and About Us pages with backend integration.

EcoCycle – Plastic Bottle Recycling Management System

Year 2 | Semester 2 | ITP

- Built recycling management system using MERN stack.
- Implemented authentication, inventory, and reporting features.

Smart Campus Management System

Year 3 | Semester 1 | PAF

- Developed full-stack system using Spring Boot and React.js.

- Implemented authentication, roles, notifications, and ticket system.
- Used MongoDB Atlas, Docker, and Maven.

UniFound – Lost and Found Management System

Year 3 | Semester 1 | ITPM

- Built MERN stack system with chat and support ticket features.
- Implemented Docker and CI/CD integration.

UI/UX & Mobile Development Projects

Doctor Appointment Mobile App UI Design

Year 2 | Semester 2 | MAD

- Designed wireframes, user flows, and interactive mobile interfaces using Figma.
- Focused on usability and user experience enhancement.

Movie Mobile Application UI Development

Year 2 | Semester 2 | MAD

- Developed user interfaces and navigation components using Kotlin and Android Studio.
- Implemented responsive mobile layouts and user-friendly workflows.

Habit Tracker Mobile Application

Year 2 | Semester 2 | MAD

- Developed an interactive habit tracking mobile application using Kotlin.
- Implemented activity tracking features and intuitive user interfaces.

Languages

- English
- Sinhala
